---

A dynamic and results-driven Web Developer with extensive experience in remote collaboration and freelancing. Offering a proficient command of a diverse technology stack, I specialize in MERN stack development with expertise in Firebase, React, Next.js, Express.js, and PHP. In addition to my strong freelancing background, I have over a year of in-office experience, consistently delivering high-quality web solutions. These attributes make me a versatile and adaptable candidate, ready to excel in both remote and in-office web development roles.

## EXPERIENCE

### FULL STACK WEB DEVELOPER
- 2019- now

**FREELANCE**

Diverse experience in web development, working with a wide range of technologies. Main focus is on building dynamic web apps using Next.js. Worked extensively with React.js, Next.js, and Tailwind CSS for modern interfaces. Very familiar with Firebase and and experienced in RESTful API development, server management, web hosting, and integrating third-party APIs. Collaborated with SEO experts and proficient in GitHub

### BACK END DEVELOPER
- May – Novermber 2022

**COHABIT PROPERTIES**

In a six-month Web Developer role at Cohabit, I contributed to a dynamic real estate website, managing Firebase back-end, Algolia integration, MailChimp email campaigns, React and Redux for front-end, Git/GitHub for version control, and Google Maps API.

### DEVELOPER & CTO
- June 2023 - now

**SAHMTALK**

Sahm talk is a social media platform intended for those interested in the stock market in the Arab world, it is still under development, soon will be launched.
I built the entire website & the backend api for the mobile app.

### FULL STACK WEB DEVELOPER
- May 2024 - now

**ROMA OPTICALS & MAKEUP**

Rebuilt and redesigned the company's ecommerce platform into a modern, robust and SEO-optimized web application, while developing an efficient backend API for the mobile app. Additionally, integrated third-party APIs to enhance functionality.
