A dynamic and results-driven Web Developer with extensive experience in remote collaboration and freelancing, offering a proficient command of a diverse technology stack. Specializing in MERN stack development, I possess expertise in Firebase, React, Next.js, Express.js, and PHP. Alongside this robust skill set, I have a track record of consistently delivering high-quality web solutions. These attributes make me a versatile and adaptable candidate well-suited for various web development roles.

EXPERIENCE

FULL STACK WEB DEVELOPER   • 2019- now

FREELANCE

Foundation Building: Started with HTML, CSS, and progressed to dynamic web development using JavaScript.

Skills expanded: Bootstrap frame work for front-end and PHP for server-side functionality, often integrated with MySQL databases.

React and Beyond: Expert in React.js and Next.js for captivating user interfaces and efficient deployment, with Tailwind CSS for styling.

Firebase Mastery: Proficient in Firebase for back-end features like authentication, storage, Firestore, functions, and hosting.

Full-Stack Capability: Experienced in RESTful API development using Node, Express, and MongoDB. Primarily a MERN stack developer.

SEO Expertise: Collaborated with SEO professionals, ensuring adherence to SEO standards.

API Integration and GitHub: Proficient in integrating external APIs and professional use of GitHub for version control.

Web Hosting and Server Configuration: Hosted and configured websites, optimizing performance and security.

BACK END DEVELOPER   • May – Novermber 2022

COHABIT PROPERTIES

In a six-month Web Developer role at Cohabit, I contributed to a dynamic real estate website, managing Firebase back-end, Algolia integration, MailChimp email campaigns, React and Redux for front-end, Git/GitHub for version control, and Google Maps API.
